## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-13 allowed over the prior art of record.
2. The following is an examiner's statement for the reasons of allowance: The claims in this application have been allowed because the prior art of record fails to disclose singly or in combination the claimed process for producing a leather-like sheet which entails heating a moisture-curable polyurethane hot-melt resin composition which contains a hot-melt urethane prepolymer having isocyanate groups at molecular terminal ends and a colorant whereby the colorant contains a polyol with a number average molecular weight within a range from 1000 to 20000 as a vehicle and a pigment.
3. Regarding claim 1, the closest prior art of references of record are Kim et al. (US 2003/0017322 A1), Kanekawa et al. (JP 2002-348347), and Shizuo et al. (JP 09-024590). The references teach similar polyurethanes which can be of the moisture curable variety and even go as far as to suggest an additional polyol such as in Shizuo where a chain extender (which is a small polyol) is also added. None of the references submit the use of a colorant whereby the colorant contains a polyol with a number average molecular weight within a range from 1000 to 20000 as a vehicle and a pigment and there is no hint in the prior art as to why such would have been an obvious/beneficial type of colorant to utilize in the coloring of a hot-melt moisture-curable polyurethane system. The colorant is found to avoid typical problems such as discoloration and color irregularity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
